I'm a software engineer with a various spheres I specialized in.

→ Embedded C/C++: I began my career as an intern at an electronics design firm. I have finished a lot of embedded projects in different spheres and have dealt with numerous MCUs, instruments, protocols, and peripherals.

→ Python: Besides that, I have worked on a large Python project based on distributed micro-services connected by PubSub/RPC Web-protocol during which I had prior team leadership experience.

→ It has always been my intention to write only high-quality, human-readable code.

→ In my free time, I also prefer to extend my knowledge of programming languages, techniques, and trends by working on hobby projects.

SKILLS

Python Development

Advanced

FastAPI

Pydantic

ORM

WAMP protocol

Async

Threading

C++ Development

master

CMake

Make

STL

Concepts

C++17

C++20

WORK EXPERIENCE (3)

Software engineer at BostonGene	2022 - Current
Support and enhance a complex Python backend that provides an environment for bioinformatics pipelines to calculate.	
Team leader at LLC "Third Pin"	2020 - 2022
Developed a flexible testing system for embedded electronics based on distributed micro-services connected by PubSub/RPC Web-protocol.	
<ul style="list-style-type: none">Robster: flexible testing system for electronic devices (Python, WAMP, Microservice, Docker, PostgreSQL)Gate valve controller (ARM, STM32, Zephyr, Modbus)GPS tracker for a professional training (ARM, Nordic, GPS, UBlox, Ant)	
Embedded Software Developer at LLC "Third Pin"	2013 - 2020
Have been finished more than 20 commercial projects in embedded area including IoT, safety systems, shipbuilding.	
<ul style="list-style-type: none">Pastilda: hardware password manager (STM32, ARM, Crypto Peripheral, SDIO, FatFS, FreeRTOS)Ship ruder control system (ARM, STM32, USB HID, FreeRTOS)Fire alarm system (ARM, STM32)MTUTA: Telemetry of vending machines (ARM, FreeRTOS, USB, SD, SIMCom, GSM, Ethernet, FTP)	

PROJECTS (2)

Pastilda	2016 - 2017
https://bitbucket.org/thirdpin_team/pastilda	
<div><div>C++</div><div>Embedded</div><div>Open-source</div></div>	
Open-source hardware designed to manage our credentials in handy and secure way.	
Just Run My Debugger!	2021 - Current
https://github.com/ila-embsys/justrunmydebugger	
<div><div>Rust</div><div>Rescript</div><div>Tauri</div><div>React</div></div>	
Pet project, simple GUI for OpenOCD debugger.	

EDUCATION (2)

Master Intelligent Technologies in Robotics at ITMO University	2016 - 2018
Bachelor Intelligent Technologies in Robotics at ITMO University	2012 - 2016
